

Carpet Tiles

CARE & MAINTENANCE

GENERAL MAINTENANCE:

1. Tiles requires no special equipment or cleaning products..
2. To keep facilities looking clean and inviting, tiles should be vacuumed daily.
3. Spills should be removed immediately with an absorbent cotton cloth and clean water.
4. Periodic maintenance should be performed, as needed using a hot water extraction-cleaning machine. Tiles has bitumen backing so water will not penetrate or harm the tiles.

NOTE: The performance and guarantee of the products used in preparation, testing, installation and maintenance of Carpet Tiles, during and after installation, remain with the manufacturer of said product and not Custom Sports Surfacing Inc.
